6 O'clock

A

6 O 'Clock I'm wasted She is in my bones This city 's all gone dead on me, again May as well find my way home No one really knows me No one ever said Surely isn't free Surely...doesn't end, honey Like a playing song in my head Drifting on, here I am Heading for the blue light Shivered back again Almost in the blue light When you shivered back again, old friend It 's coming on, in my head... Playing on and on Something too hard will be ok The things you do... It 's coming with you... Here comes the blue light Here comes the blue light ...Still playing on...
