

Running Out of Time

Pennywise

People all around us are covering up their eyes
Hard to find the answers, believing all the lies
Wonder when we'll stop it when will all of this end
Got one last message to send We're killing off the planet, the end is drawing near
Brother fighting brother, a world interned by fear
If we don't try and stop it, we slowly start to die
Got this one last chance to try If you want a future, you decide
It's crumbling all around you, it happens here so many times
Must be some solutions to find a way
If we don't get some answers one day
Soon you can bet we're going to pay
There's got to be away
So give us one good sign to decide whose side we're on
'Cause we're running out of time Millennium upon us and still we are denied
Fruits of public labor unevenly supplied
Prosperity is limited to just a precious few
Only one thing left to do Ancients spent religions serve to separate the race
Into tribes that fight each other system must be replaced
Xenophobic zealots are preparing for war
What is it we're fighting for If you want a future, you decide
It's crumbling all around you, it happens here so many times
Must be some solutions to find a way
If we don't get some answers one day
Soon you can bet we're going to pay
There's got to be away
So give us one good sign to decide whose side we're on
'Cause we're running out of time Nation of hypocrisy discontent of lunacy
Afraid we'll never see the signs
Start the quest to find the truth
Take no more of this abuse
Or one day they will find you running out of time They will find you running out of time
They will find you running out of time
They will find you running out of time
They will find you running out of
