It's You

Melissa Otero

She calls me up and says "I'll always be alone"
What happened? What went wrong? Why the negative tone?
I've told you more than once before
Love needs some time you know, stop thinking it won't come to youIt's driving me crazy
Seeing you somber
Wanting the thunder of your first kiss
Forcing to wonder won't get you there
Love should come first from within
It's in you, youDon't you remember what I said?
You need to love yourself more
Lose the tears in your eyes
And you will see it soar
I've felt this kind of love before
It's amazing, yes it is
I promise you won't regret itIt's driving me crazy
Seeing you somber
Wanting the thunder of your first kiss
Forcing to wonder won't get you there
Love should come first from within
It's in you, youI can see your glow
Child your love is more than you know
It is the cureStop driving me crazy
Being so somber
Wanting that thunder of your first kiss
No need to wonder what love's about
Look at yourself, please figure it out
It's in you, you
