

That's When You Know It's Over

Lee Brice

When you can look at her picture and not wanna kiss her no more
when you dont feel like youve been hit by a train at the sound of someone
sayin her name anymore
when you can drive down the road and not be afraid of whats playin on the
radio

Thats when you know its over
Thats when you know you made it over to the other side
ready for another round
Thats when you know its over
When the time of the year dont stir up the tears anymore
When it dont feel like the past isnt gone and theres nowhere to run anymore

It dont take every bone to not dial her number just leave her alone
Thats when you know its over
Thats when you know you made it over to the other side
ready for another round
Thats when you know its over
When you wouldnt go back even if you could
When hearin shes happy finally feels good
Thats when you know its over
Thats when you know you made it over to the other side
ready for another round
Thats when you know its over
Thats when you know its over
