She says I'm cold
Only time I'm comfortable kissing is sending X and O's
I send a message back to dispute this fact, but this I know
I hope to find my love, like we used to before dial-up
Whatever happened to our phone sex,
Right now can't think of anything we don't text
I broke her heart on the email,
I'm so cold I'mma just spare y'all the details
I can't even tell y'all what's real, I got an iTouch but I can't feel

Past was the word, now we livin' in the future
Past was the word, now we livin' in the future
Past was the word, now we livin' in the future
Past was the word, now we livin' in the future (I'm afraid we would never know)
Past was the word, now we livin' in the future
Past was the word, now we livin' in the future (What's real)
Past was the word, now we livin' in the future
Past was the word, now we livin' in the future (I'm afraid we'd never know)
Past was the word, now we livin' in the future
Past was the word, now we livin' in the future
Past was the word, now we livin' in the future (Yeah yeah)
Past was the word, now we livin' in the future
Start mackin' on my blackberry,
She got jealous I was tappin' on my black berry
So she didn't keep in touch and I can't tell the difference,
We ain't see each other much
Aside from some late night texts, a couple O's, a few X's
My current feels just like my ex's,
Different characters, same letters
Red light, another message,
Spillin' her heart out, what a mess this is
P.S. this is BS, I can't even spell it out, am I that unaffectionate?

And it's supposed to be vice-versa

I don't know I kinda like this surf stuff

We used to see tears when we hurt stuff

I guess it got faster but colder

We iChat, that's how she comes over

That's better than not seeing her

And I'm so glad I'm serving her like Serena

She can YouTube in the arena

And we close no matter how many miles between us

I told her "Welcome to the future"

That's just how it is, I'm a user Computerized
