Sanguine

Moonspell

Find me with the howling
In the night I will be waiting under
Remember how cold the touch
When you fall with anotherApproaching the eternal dayThe everlasting nothing between us
The everlasting nothing around usReturning in your other shape
At midnight the failing wonder
Remember there can be only one
We the trophy of each otherSanguine - your love comes to me in oceans of bloodFind me with the howling
In the night I am going under
Remember how cold the touch
You have fallen with anotherLeave me by the fading
Silenced in the trust
Remember how cold the touch
When we breed one anotherSanguine - your love comes to me in oceans of bloodThe everlasting ignorance around us, forever living sickness inside us
The silence still not finished with us, the madness breeding when we do
For you I will cut my veins open and let you hide on them
For you I will cut my veins open, let you live freely on themSanguine - your love comes to me in oceans of blood
