

# United Abominations

## Megadeth

Poverty in their kitchens  
Held hostage by oil for food  
Yet their own plates are full of the fat of their lands  
There's no blood on their hands, right Kojo?  
They promised to tell the truth  
Without leaving a fingerprint  
They will lose the UN one way or another  
The victim, I fear will be us, sisters and brothers  
The UN is right, you can't be any more un  
Than you are right now, the UN is undone  
Another mushroom cloud, another smoking gun  
The threat is real, the Locust King has come  
Don't tell me the truth  
I don't like what they've done  
It's payback time at the United Abominations  
A grave and gathering danger  
The decision to attack  
Based on secret intelligence it'll take years  
I fear to undo the failings in Iraq  
You may bury the bodies  
But you can't bury the crimes  
Only fools stand up and really lay down their arms  
No, not me, not when death lasts forever  
The UN is right, you can't be any more un  
Than you are right now, the UN is undone  
Another mushroom cloud, another smoking gun  
The threat is real, the Locust King has come  
Don't tell me the truth  
I don't like what they've done  
It's payback time  
The UN is right, you can't be any more un  
Than you are right now, the UN is undone  
Another mushroom cloud, another smoking gun  
The threat is real, the Locust King has come  
The UN is right, you can't be any more un  
Than you are right now, the UN is undone  
Another mushroom cloud, another smoking gun  
The threat is real, the Locust King has come  
Don't tell me the truth

I don't like what they've done  
It's payback time at the United Abominations
