Radiator

The Like Young

[Verse 1:]Goodbye humans, goodbye earth
I've left this place and all its worth
I am transcending space and time
I'm traveling at the speed of light
Affection, reflection
This is the new direction
Conspiracy is idiocracy
I radiate light's transparency
[Pre Chorus 1:]Generation
Radiation
We are the chosen nation
[Chorus:]Hey you, you're blowing my mind again
Out of my skull, I feel the levitation
I feel my skin crawling off of my soul
I feel your radiation

[Tag:]I'll be a radiator just like you
Radiate it on me, burn it on through
I feel the radiation
Radiate it on me
[Verse 2:]Hello future, hello birth
This is your newborn universe
There is no longer wrong or right
We have become a source of light
[Pre Chorus 2:]Conceptual
Celestial
We are extraterrestrial
Creator
Vindicator
We are the radiators
