

Every Waking Moment

Citizen Cope

I've watched a country move slow
I've watched a city for a dollar get sold
I've watched a bella take off her clothes
I watched the miles through the car window
And every waking moment I'm alive
I'm searching for you whether I know it,
Or whether I'd realized
Well every waking moment I'm alive
I'm searching for you whether I know it
Or whether I've realized
Every waking moment I'm alive
I've been to Paris
I've been to Rome
Never been too lost, but I lie and say I've gone

I've been touched by a woman that I lost
I've been real high
I've been real low
And every waking moment I'm alive
I'm searching for you whether I know it,
Or whether I'd realized
Well every waking moment I'm alive
I'm searching for you whether I know it
Or whether I'd realized
Every waking moment I'm alive
Every waking moment I'm alive
