## The Crystal Lake

## **Grandaddy**

Should never have left the crystal lakeShould never have left the crystal lake

For parties full of folks who flake

Italian leather winter games

Retired by the duraflamesThe crystal lake it only laughs

It knows you're just a modern man

It's shining like the chandelier

Shining somewhere far away from hereI've gotta get outta here

I've gotta get outta here

I've gotta get outta here

I've gotta get outta here

And find my way again

I've lost my way againShould never have left the crystal lakeShould never have left the crystal lake

For areas where trees are fake

And dogs are dead with broken hearts

Collapsing by the coffee cartsThe crystal lake it only laughs

It knows you're just a modern man

It's shining like the chandelier

Shining somewhere far away from hereI've gotta get outta here

I've gotta get outta here

I've gotta get outta here

I've gotta get outta here

And find my way again

I've lost my way againShould never have left the crystal lake
