

Utter Space

Men Without Hats

I come from outer space, at least I think I do
I need a change of pace that's why I walk with you
It's a change up-left-one-two in outer space I've had a change of heart, I'm tired of being the best
I need another part to make an educated guess
And help me pass the test in outer space In outer space
In outer space I come from outer space, at least I think I do
I need another face, I need one just like you
It's a change up-left-one-two in outer space In outer space
In outer space The space
Outer space
The space
In outer space
