

# Better Things

## Massive Attack

Don't drag me down just because you're down  
And just 'cause you're blue, don't make me too  
And though you've found, you need more than me  
Don't talk to me about being free That's freedom without love  
And magic without love  
Magic without love Hear me say  
Better things will surely come our way  
Hear me say  
Better things will surely come our way You say the magic's gone, well I'm not a magician  
You say the spark's gone, well get an electrician  
And save your line about needing to be free  
All that's bullshit babe, you just want rid of me You want freedom without love  
And magic without love  
And magic without love, yeah Hear me say  
Better things will surely come my way  
Hear me say  
Better things will surely come my way
