## **Better Things**

## **Massive Attack**

Don't drag me down just because you're down And just 'cause you're blue, don't make me too And though you've found, you need more than me Don't talk to me about being freeThat's freedom without love And magic without love Magic without loveHear me say Better things will surely come our way Hear me say Better things will surely come our wayYou say the magic's gone, well I'm not a magician You say the spark's gone, well get an electrician And save your line about needing to be free All that's bullshit babe, you just want rid of meYou want freedom without love And magic without love And magic without love, yeahHear me say Better things will surely come my way Hear me say Better things will surely come my way
