## Machine Head

Ohh

Charge

Charge

Charge

ChargeElectricity is pulsing through our veins

A charge is racing

A chain reaction through

The four of us to you

Will make the transformers begin

Converting into overdrivePower surge now exploding through

Energy, filling the ominous, void within you

No need to live your life in that gap

Got what you need right

Here on lightning tap, soCharge me, charge you

Charge us, charge through

Amplify, terrify

Supercharger electrifiesGetting under skin, we're like a rash

Spreading over your body

We are the itch you scratch

That doesn't seem to go away

Protons, neutrons, the electrons

Synchronizing into oneIn sheer power all will pale

Heaviness off the Richter scale

Forever crushing the

Competition in their tracks

One hundred thousand volts we blast, soCharge me, charge you

Charge us, charge through

Amplify, terrify

Supercharger electrifiesYour, little sticks of dynamite

We're the fuse and we're the lightElectricity is pulsing through our veins

A charge is racing

A chain reaction from the four of us to you

Has made it crystal clear

We'll win this war

Destiny, victoryBraveheart mindset, full attack

Kamikaze, they never look back

In this war

A victory is if you feel this too

You feed off us, and we feed off you, soCharge me, charge you

Charge us, charge through  
Amplify, terrify  
Supercharger electrifies Charge me, charge you  
Charge us, charge through  
Supercharger  
Supercharger  
Supercharger  
Supercharger
