

# Destiny

## Heavenly

The future is nowhere  
It comes to you like a divine star  
One night when nightmares invaded my head  
He appeared to me from the sky  
Floated in the air, it dazzled my eyes  
And he carried me for a flight  
Too tired to understand  
I crossed the galaxy  
Universe of fire I saw  
Showed me so many ways  
Then I felt lost in time  
I'm a hero, an alien is a friend of mine  
By a fantasy I have found my destiny  
Then I knew, that all over the clouds of human kind  
Exists another destiny  
A world where is growing all love  
Into his machine lights surrounded me  
Flashed on my face so bright  
Left behind me my memories and griefs  
Run away after the past  
So tired to understand  
I crossed the galaxy  
Universe of fire I saw  
Showed me so many ways  
Then I felt lost in time  
I'm a hero, an alien is a friend of mine  
By a fantasy, I have found my destiny  
Then I knew, that all over the clouds of human kind  
Exists another destiny  
A world where is growing all love  
By a fantasy, I have found my destiny  
Then I knew, that all over the clouds of human kind  
Exists another destiny  
A world where is growing all love  
By a fantasy, I have found my destiny  
A world where is growing all love
