Silver & Gold

Primal Fear

Ticking like a time bomb, I knew the time was right
Dead place of destruction and no paradise in sight
Burning down the seven wonders, trapped in anarchy
And there is no turning back at what we leftWhere do we go - destination unknown
Where can we stay - the world's shakin' awayFor silver and gold, we're searching for souls
We are the light and we're kissing the day
Silver and gold, your future is sold
The deadzone in flames in the eye of the stormLike a nuclear reactor your nightmare's getting real
Tangled in a web of darkness time is standing still
Comin' as invaders, sailed the seven seas
Burned and marked forever now - but whereWhere do we go - destination unknown
Where can we stay - the world's shakin' awayFor silver and gold, we're searching for souls
We are the light and we're kissing the day
Silver and gold, your future is sold
The deadzone in flames in the eye of the stormFor silver and gold, we're searching for souls
We are the light and we're kissing the day
Silver and gold, your future is sold
The deadzone in flames in the eye of the stormFor silver and gold, we're searching for souls
We are the light and we're kissing the day
Silver and gold, your future is sold
The deadzone in flames in the eye of the stormSilver and gold
