

# Mindphaser

## Front Line Assembly

Jesus, had days like this  
Cyborgs, cybernetic organisms  
Machines with living human tissue and programmed to destroy  
The silence is deafening, regression hangs in the  
air  
A motionless world sits waiting for new codes  
A war of technology threatens to ignite  
Digital murder, the language of machines  
Mesmerized by a decade of faith, flowers and remorse  
Fading vision lost in time, tragedy on course  
Synthetic conspiracy, masters of the human race  
The mind now knows new levels of fear  
Implanted brain cells, control is gone  
We seem to believe truth is regression  
The tension shows, the tension shows  
A quantum leap forward  
Mesmerized by a decade of faith, flowers and remorse  
Fading vision lost in time, tragedy on course  
OCP binary cyborg technology  
State of the art destructive capabilities  
Jesus, had days like this  
The target we seek slowly comes into sight  
The countdown begins for launch into Hell  
The tension begins  
Mesmerized by a decade of faith, flowers and remorse  
Fading vision lost in time, tragedy on course  
State of the art destructive capabilities  
The kill is swift, it makes no  
sound, aggression take its toll  
Rhythm of violence cuts through the air, there's no more control  
The sky turns brighter, an evil red, missiles fly through the air  
Shattered dreams, shattered hopes, there's bodies everywhere
