

I Found You

The Mastersons

I never knew it could be so easy
Cause I always made things seem so hard
I complicate 'em and fail to see things how they are
And you might be the find of the century
You could be my good luck charm
I didn't know that I was searching for you all along
Now I believe that love
would swallow up the blue
it's all or nothing now
that I found you
I found peace in simple things
an easy truth that we both know
you found angel wings but spoke to me in earthly tones
Now I believe that love
would swallow up the blue
it's all or nothing now
that I found you
You and me we're shining bright
We paid the piper, we'll call a tune
We finally got it right, I think the stars I fell for you
Now I believe that love
would swallow up the blue
it's all or nothing now
that I found you
Cause we believe in love
and we've learned a thing or two
it's all or nothing now
that I found you
I found you
