

# Hold On To Me (Piano Version)

## Placebo

Who let the cat out of a bag?  
Who told the world I was older?  
Who laughed at all I had?  
Who said the race was over? I am a small and gentle man  
Who carries the world upon his shoulders  
Kindly lend a helping hand  
Come over And hold on to me  
Hold on to me  
And hold on to me  
Hold on And my behavior is hard to understand  
When I'm like a phone with no connection  
But I'm still doing all I can  
To try and get me some redemption And I'm knee deep in sinking sand  
Crying out for your attention  
Kindly lend a helping hand  
For once defy convention And hold on to me  
Hold on to me  
Hold on to me  
Hold on And hold on to me  
Hold on to me  
Hold on to me  
Hold on Our task is to transform ourselves into awakened multidimensional beings  
Thus fully merging the fourth and fifth dimensions into the third  
It is the inner union between Earth ascending and Heaven descending  
This sacred merger has already been achieved by many of us  
And numerous others are awakening daily as the Call steadfastly intensifies  
We are reclaiming our Divine Birthright and Heritage  
Remembering that we are Angels incarnate, vast starry beings of Light  
Who are no longer limited and bound by the illusions of time, space and matter We are ready to join as  
emanations of the One  
The new doorways cannot be opened or passed through  
By any of us still operating as individual beings of consciousness  
They are brought into manifestation through our Unified Presence  
Through our focused intent  
Through our total commitment to serving our Higher Purpose  
This is the bridge to an entirely different energy patterning  
It is the step beyond the known dimensional universe  
It is a journey into the unknown which shall lead us ever closer to home
