

# The Way

Neil Young

The way, we know the way  
We've seen the way, we'll show the way  
To getcha back home  
To the peace where you belong If you're lost and think you can't be found  
We know the way, we've got the way  
We'll lead the way to getcha back home  
To the peace where you belong The way, we know the way  
We've got the way, we'll share the way  
To bring you back home  
To the peace where you belong So many lost highways used to lead home  
But now they seem used up and gone  
They sure had the magic when they were first found But not this road, this road has never been closed  
It's still brand new The way, we know the way  
We've seen the way, we'll show the way  
To bring you back home  
To the peace where you belong If you're lost and think you can't be found  
We know the way, we've got the way  
We'll lead the way to getcha back home  
To the peace where you belong Where you belong, where you belong  
Where you belong, we know the way  
To getcha back home  
To the peace where you belong When faceless and anonymous  
Come to beat down your door  
And say you're all washed up and done  
You can just say they have nothing  
In store to touch this soul Because they just don't know  
They just don't know the way The way, we know the way  
We've seen the way, we'll show the way  
To getcha back home  
To the peace where you belong The way, we got the way  
We know the way, we'll lead the way  
To getcha back home  
To the peace where you belong If you're lost and think you can't be found  
We know the way, we've found the way  
We'll share the way to getcha back home  
To the peace where you belong The way, we know the way  
We've seen the way, we'll show the way  
To getcha back home  
To the peace where you belong
