

# Aliens & Rainbows

## Ferras

I never really made it to the human  
That you wanted me to be  
The glamor parade night after night wasn't me  
I would rather be alone with aliens & rainbows  
On the other side of the universe  
And finally this is me  
This is my coup de grace, my reality  
We're only gonna hear 'em if we listen  
But you keep talking all the time  
And the radio and television  
Static confusion in my mind  
I would rather be alone with aliens & rainbows  
On the other side of the universe

And finally this is me  
This is my coup de grace, my reality  
A star is only glitter  
When it shatters in the night  
And it all turns into nothing  
Aliens & rainbows  
Somewhere out on the other side of the universe  
And finally this is me  
This is my coup de grace, this is my reality  
This is my ending, it's an ending  
I would rather be alone  
With aliens & rainbows
