Spirit Never Die

Masterplan

There was a place - a little town
Where we used to play and laugh around
We went too far - reaching for that star
And the light moved away from meAnd the spirit never died - the world belongs to me
This is when I've been given time to live and seeI'll never give up - never give in
Won't stop believing cause I'm gonna win
Sing with my soul before I get old
Cause there may be no tomorrow
There is no limit to what can be done
Climbing the mountain with power so strong
Dusty roads - down the way
Leaving the future behind meI got a fast car - like a rock star
Come and join the ride with me
Take a spin downtown
Check out who's around
I'll show you where you wanna beAnd the spirit never dies - let the music take you higher
I know what it means to burn
That's how I began to learnSo never give up - never give in
Rise from the fire if you're gonna win
Sing with your soul - soon you'll be old
Fight the demons inside you
There is no limit to what can be done
Climb every mountain with power so strong
Dusty roads on the way - leaving the past behind youI've seen love in vain
I have felt the pain
Torn in desire
Lead by the fire
And as I lived it all the world became to small
And my colors grew colderThe spirit takes me higherNever give up - never give in
Won't stop believing cause I'm gonna win
Sing with my soul before I get old
What if there's no tomorrow
There is no limit to what can be done
Climbing the mountain with power so strong
Dusty roads - down the way
Leaving the memories behind meUse the spirit
