Spirit Never Die

Masterplan

There was a place - a little town

Where we used to play and laugh around

We went too far - reaching for that star

And the light moved away from meAnd the spirit never died - the world belongs to me

This is when I've been given time to live and seeI'll never give up - never give in

Won't stop believing cause I'm gonna win

Sing with my soul before I get old

Cause there may be no tomorrow

There is no limit to what can be done

Climbing the mountain with power so strong

Dusty roads - down the way

Leaving the future behind meI got a fast car - like a rock star

Come and join the ride with me

Take a spin downtown

Check out who's around

I'll show you where you wanna beAnd the spirit never dies - let the music take you higher

I know what it means to burn

That's how I began to learnSo never give up - never give in

Rise from the fire if you're gonna win

Sing with your soul - soon you'll be old

Fight the demons inside you

There is no limit to what can be done

Climb every mountain with power so strong

Dusty roads on the way - leaving the past behind youI've seen love in vain

I have felt the pain

Torn in desire

Lead by the fire

And as I lived it all the world became to small

And my colors grew colderThe spirit takes me higherNever give up - never give in

Won't stop believing cause I'm gonna win

Sing with my soul before I get old

What if there's no tomorrow

There is no limit to what can be done

Climbing the mountain with power so strong

Dusty roads - down the way

Leaving the memories behind meUse the spirit
