

Future (feat. Khalil x Kehlani)

[Justin Bieber](#)

(It's too easy)
Future, such a great future
Oh, baby, we'll see what the future holds for us
Oh no When it's raining, it's pouring, how do I always end up the enemy?
How do I wake up in the morning? You're not right next to me How could we throw it all away?
Guess I'll move on to better days Maybe there's a future, such a great future
(See what the future holds)
Maybe yes, next time, what if there's no next time?
(I don't know what the future knows) Future, future
(Is it that bad? Is it that bad?)
Future, future
(Live this moment, we'll enjoy it) When our love has been broken, we can barely even speak
One minute we're so red, the next we're knocked right up our feet How did we throw it all away?
Guess we'll move on to better days, yeah Maybe there's a future, such a great future
(See what the future holds)
Maybe yes, next time, what if there's no next time?
(I don't know what the future knows)
Maybe there's a future, such a great future
See what the future holds
Don't know what the future knows
Maybe yes, next time, what if there's no next time?
(I don't know what the future knows) Future, future
(Is it that bad? Is it that bad?)
Future, future
(Live this moment, we'll enjoy it)
