Let It Go

Cavo

Wait it out till the light
Take a breathe, say good night
But don't ever go awayWait around to find the time
Only you can take what's mine
But don't ever go awayI'll be waiting', I need to let it goFade it out into the light
All these years we never get it right
I need to let it goNo more reasons to defy
That I believed that you were mine
I need to let it goA chance to change or stay the same
One night with out the blame
That don't ever go awayOnly you can make it right
To walk away with out a fight
But don't ever go awayI'll be waiting, I need to let it goFade it out into the light
All these years we never get it right
I need to let it goNo more reasons to defy
That I believed that you were mine
I need to let it go
I wish you'd let me go
