

Let It Go

Cavo

Wait it out till the light
Take a breathe, say good night
But don't ever go away Wait around to find the time
Only you can take what's mine
But don't ever go away I'll be waiting', I need to let it go Fade it out into the light
All these years we never get it right
I need to let it go No more reasons to defy
That I believed that you were mine
I need to let it go A chance to change or stay the same
One night with out the blame
That don't ever go away Only you can make it right
To walk away with out a fight
But don't ever go away I'll be waiting, I need to let it go Fade it out into the light
All these years we never get it right
I need to let it go No more reasons to defy
That I believed that you were mine
I need to let it go
I wish you'd let me go
