The Metal Age

HammerFall

Icy water on my hands
The roar of thunder everywhere
I close my eyes, I realize I'm far away from home
In the twilight zone, the shadows mourn
Out of the night came a shinin'
The metal ageIvory towers conceal my eyes
Caught up in a long lost time
Where no one speaks at liberty they guard their destiny
To forge the steel, they will reveal
Out of the night came a shinin'
The metal ageI'm fallin' into the breach
Well I'm a stranger in this land, I'm fallin'Standing strong, the brave and elder
With scars seldom forgotten, above it all
Come with us, offering shelter from the icy wind that shiver
Come with us to the twilight zone, oh yeah
You're welcome to the metal ageHear the bell begins to chime
The moonlit skies burst out in flames
The time has come, it must be done, let the power be unchained
By the force within, let the war begin
Out of the night came a shinin'
The metal age
