

Family Of Noise

Adam Ant

A lot of people in this great big world
Say "Love everybody"
A lot of people busy, busy, busy, busy, busy
Being very modern
But the family of noise is here
And it's come to save everybody
The family of noise is here
And it's come to save you and me
It goes
The family of noise is here
And it's come to save everybody
The family of noise is here
And it's come to save you and me
A lot of people in the ancient world
They loved only quiet
And then along came the machine
And a new direction

The family of noise is here
And it's come to save everybody
The family of noise is here
And it's come to save you and me
It goes
In the morning
Last thing at night
In the darkness
Standing in the light
A lot of people in this great big world
Just searching for the "Pure" sound
They're just looking to the machine
They don't listen to the noise
The family of noise is here
And it's come to save you and me
In Croydon
