Something New In My Life

Stephen Bishop

I guess I wanted something new in my life
A new key to fit a new door
To wake and see a different view in my life
The one I've been waiting forDreams like everyone I've had a few in my life
Who knew that this one would come true in my lfe
I knew the moment when you touched me
You touched meYou're like a sudden breeze that blew in my life
A new face, a new smile, new song
And now I know I wanted you in my life all alongI guess, I must have saved an empty place in my heart
For you to come and fill this space in my heart
That long before I said I loved you
I love youWhatever happens this is true in my life
When all the springs have come and gone
Whatever dance I made or do in my life
Whatever else that I may do in my life
You'll always be something new in my life
From now onI know there always will be you in my life
From now onYeah, yeah, yeah
