I Remember

Wet Wet Wet

Should have known better
I should have known better

How I long for those warm summer nights
Of playing the fool and getting uptight
Crush my precious wish to the ground
You have a sunshine taste of forgive and forget

I remember having all the love to give
I remember a precious kiss upon my loving lips
You've touched my heart, my soul and everything
I remember having all the love to give
I remember a precious kiss upon my loving lips
Please help me

Looking back at what we had
Say I still want you so much
Loving you for just one reason
Loving you for just one season
Means you're required for desire

I remember having all the love to give
I remember a precious kiss upon my loving lips
You've touched my heart, my soul and everything
I remember having all the love to give
I remember a precious kiss upon my loving lips
Please help me

Loving you, loving you, loving you
Please, please help me
And I try, and I try, and I try to act naturally
