

Worms And Angels

Echobelly

Here and now, we are alone
Time, she will hold her breath
Only the worms and angels Know our names
But they have not found us
Although they surround us
I feel the distance closing Come along, for you and I know
We've lived through the centuries
We've ridden the darkest horses All our lives
We hunted our enemies
We fought with a fallacy
It's time we were all God's children Far away, the galaxies soar
The stars are exploding still
I wish we could fly away
Fly away Here and now, for you and I know
That true love is deathless
These crumbling days are ending By my side
Let's walk in the garden
We'll sleep in the ivy
We'll be with the worms and angels
