

Night Owl

Little Big Town

Where the stables the skies will meet
Through the lonely and deserted streets
I've been wandering my way, back home. See the girl with the secret smile
There goes my heart a million miles away where ever I roam. Praying for bright head lights
Coming over the hills (I'll never go away again I swear)
It's turning darker with the passing time,
But I'll be here still (I hope you're not asleep when I get there)
I'm a night owl waiting for you. Counting lights, and waters house
I'm making ground, burning daylight hours
Getting lost in rolling field, pastors. But as the stars began to fall
I find myself tryna to count them all
And wish on one to get me there faster. Praying for the bright head lights
Coming over the hills (I'll never go away again I swear)
It's turning darker with the passing time,
But I'll be here still (I hope you're not asleep when I get there)
I'm a night owl waiting for you. Hurry up, hurry up
Before the morning
I'll be staying up, staying up
Dreaming of you Praying for bright head lights
Coming over the hills (I'll never go away again I swear)
It's turning darker with the passing time,
But I'll be here still (I hope you're not asleep when I get there)
I'm a night owl waiting for you. I'm a night owl waiting for you.
