

My Best Girl

Ub40

I'm gonna tell my friends about you
Tell them about the things that you do to me
Tell them you're my best girl and best you'll always be
Tell them you're everything that's good so good to me
I want to be always close to you
To give a helping hand if ever you're in need
I want to be always close to you
Don't have to try you out for size
You fit my heart so comfortable and warm
The only one I have no doubt no fear about
Without you what would my life be
I want to be always close to you
To give a helping hand if ever you're in need
I want to be always so close to you
I want to be always close to you
To give a helping hand if ever you're in need
I want to be always close to you
Don't have to try you out for size
You fit my heart so comfortable and warm
The only one I have no doubt no fear about
Without you what would my life be
Without you what would my life be
Tell them you're my best girl and best you'll always be
Tell them you're my best girl and best you'll always be
Tell them you're my best girl and best you'll always be
Tell them you're my best girl and best you'll always be
