

# Paragon

[Charlotte Hatherley](#)

Caroline, inspiration true  
Left it all behind and turned her hand to something new  
Suddenly left for better shores  
With the kind of reckless abandon that we applaud  
If I could, I would follow you  
Caroline showed us what to do  
Made it on your own terms oh yes, we look up to you  
You call the tune  
And if I could I would fly through the air  
I would fly out to meet you  
Cross the void and travel interplanetary  
Oh! Lets go, stick it to the rules we wanna be like you oh  
I can see your light up in the sky, moving over city satellites  
Pick me up, take me to another solar system I can cut, oh  
Help me find the strength to follow through  
Caroline I couldn't do it without you, oh  
Stuck in a rut, sunk inside a groove  
I could disappear here, all my instincts say it's true  
I wanna do something that has merit to it  
That will strike a chord and resonate as far as you  
Oh if I could, I would fly through the air  
I would fly out to meet you  
Cross the void and travel interplanetary  
Oh! Lets go, stick it to the rules we wanna be like you, oh  
I can see your light up in the sky, moving over city satellites  
Pick me up, take me to another solar system I can cut, oh  
Help me find the strength to follow through  
Caroline I couldn't do it without you  
Oh do you think that I could ever make a difference  
If I really try?  
Help me find a way to cut loose  
Caroline I couldn't do it without you  
I was unaware that you were gonna go  
I didn't know you well enough to know  
I've always thought of you and how you're moving on  
On, on, yeah you're a real paragon  
On, on, on yeah you're a real paragon  
On, on, on yeah you're a real paragon  
On, on, on yeah you're a real paragon  
If I could I would follow you  
If I could I would follow you  
If I could I would follow you
