

Fangz (Live at Warped Tour 2014)

The Ready Set

Fangs, fangs, fangs, fangs Ordinary life they thought we'd turn out to be
Hard to swallow, yeah, that happened naturally
No point deceiving, I think the world should see us for what we are
For what we really are Stack up your fears, that shit you'll never need
You've got that spark, I've got this gasoline
We'll watch it burn, watch it ember out
We're on our own now, now, now Don't let go, you are in control and you're ready
Take what's yours, come on now and let them (let them, let them, let them)
Let em see your fangs (Fangs, fangs) see your fangs (x2) The bad & the better, yeah if it's all the same
We sink or swimming against these tidal waves
Never gonna fit in, living life like we're misfits
That's what we are, that's what we really are So throw your hands up higher if you feel the need
And break the mold tonight until we're recklessly
We'll watch it burn, watch it ember out
We're running in now, now, now Don't let go, you are in control and you're ready
Take what's yours, come on now and let them (let them, let them, let them)
Let em see your fangs (fangs) (Fangs, fangs) see your fangs (x2) Never, never let your lights out
Never, never try to hide out
From the world, it's like staring at the sun So don't let go, you are in control and you're ready
Take what's yours, come on now and let them (let them, let them, let them)
Let em see your fangs (Fangs, fangs) see your fangs (x2)
