## **More Than This**

## **Peter Gabriel**

I woke up and the world outside was dark

All so quiet before the dawn

Opened up the door and walked outside

The ground was coldI walked until I couldn't walk anymore

To a place I'd never been

There was something stirring in the air

In front of me, I could seeMore than this

More than this

So much more than this

There is something else there

When all that you had has all gone

And more than this

I stand

Feeling so connected

And I'm all there

Right next to youIt started when I saw the ship go down

I saw them struggle in the sea

And suddenly the picture disappears

In front of meNow we're busy making all our busy plans

On foundations built to last

But nothing fades as fast as the future

And nothing clings like the past, until we can seeMore than this

More than this

So much more than this

There is something out there

More than this

It's coming through

And more than this

I stand alone and so connected

And I'm all there

Right next to youOh then it's alright

When with every day another bit falls away

Oh but it's still alright, alright, alright

And like words together we can make some senseMuch more than this

Way beyond imagination

Much more than this

Beyond the stars

With my head so full

So full of fractured pictures

And I'm all there
Right next to you
So much more than this
There is something else there
When all that you had has all gone
And more than this
I'm alone
Feeling so connected
And I'm all there right next to youMore than this
More than this
More than this
