

# Heart

Vincent Liou

Will you share a spark of that fieriness?  
We'll need it to reach the zenithEven if you drift beyond the seas  
    The tide will still return you back to me  
    When your body floats above the clouds  
        Gravity will soon bring you down  
        You have my heart  
        In every single way  
You have my heartLet's not keep this love sub rosa  
    Let it out like a supernova
