

# Desire

Andy Gibb

We may be big or small or black or white, eternally  
And black and white is you and me in a special light  
We may be young or old or in between, but this much I know  
Together we can learn to grow  
In a world that's ever turning it's back on you[Chorus]  
If you give it all away,  
Make it mine, mine, ine, ine, ine  
You are desire, everything you need I give you right or wrong  
And you are the woman that I base my whole existence on And when I get to you my desire is glowing in your  
light  
These are the golden years we get to live, we lead the way  
Tomorrow we can start today in a special light  
Love could be good or bad or in between, but this much I learn  
Baby, you and I can learn  
In a world that's rearranging it's reality[Chorus] And it's nice to light a fire when it's cold outside[Chorus] You  
are desire, everything you need I give you right or wrong  
And you are the woman that I base my whole existence on  
And when I get to you my desire is glowing in your light
