# Let It Go

## Pop Evil

Open your eyes
See through the pain
Remember how we used to be
Before you let it go
Let it go

I remember lying right here with you
Staring up at the light of the summer moon
Planning out the days till the end of our lives
Whoa-ho, didn't sleep at all those nights
There was nothing we couldn't do
Nothing left in the world we had to prove
How'd we end up like we did?
Both alone, tossing in an empty bed

You say our hearts still aching
But I say it's not too late

Open your eyes
See through the pain
Remember how we used to be
Before you let it go
'Cause all of our wrongs can't be made right
Without you I'm half the man I used to be
You always were the better part of me

There was a time when our glass was full
But then you would push and I would start to pull
Spilling every ounce of anything good
If I could, take it back I would
'Cause with you right there by my side
You got to admit it was a beautiful ride
Two young hearts beat till their broken
And now, so much still unspoken

It's obvious I'm still breaking
Tell me it's not too late

Open your eyes
See through the pain

Remember how we used to be
Before you let it go
'Cause all of our wrongs can't be made right
Without you I'm half the man I used to be
You always were the better part of me

Before I break
I give you my word
This time I will change
We were always so good together
Won't you let it go
Won't you let it go

Open your eyes
See through the pain
Remember how we used to be
Before you let it go
'Cause all our wrongs can't be made right
Without you I'm half the man I used to be

You always were the better part of me
You always were the better part of me
You always were the better part of me
