

# The Experiment

Robert Holmes

Action speaks loud, louder than any word  
You need to watch it all, you need to learn It all  
False smiles, all hypocrits  
You know you paying all you need to watch your back  
Do you think he's cured  
Do You think he's sane  
Do you think he's free  
Do you think at all?  
Being you and not being me  
Is this way to cure a life so obscured?

Experiment from the government  
It's a moral sin of our society  
Experiment from the government  
It's a moral sin of your society  
They're feeding lies to an empty mind  
A mind impelled to be good  
A chemical war inside - no choice no more  
An human guinea pg - no choice no more  
He ceases to be a man - no choice no more  
He has no choice no more - no choice no more
