Particle

I-Exist

Your pain makes you beautiful, you love to lose control
And mediocrity's rewarded, set your standards low
In an imploding star or a burned out car, I implore you
In a carbon arc or a dim lit park, I implore youSuck me in, I'm willin', I get off when you turn on
Let me be your fate, pour it on, pour it on
In a country fair or union square, I implore you
In a shrouded face, in a spray of mace, I implore you
I implore youCryptical, oh and I know you transcend when you succumb
One last shred of frailty left, embedded in our bones
In an imploding star or a burned out car, I implore you
Or a carbon arc or a dim lit park, I implore you
I implore youDo it again, do it again, do it again, do it again
Do it again, do it again
Do it again, do it again
This is what they mean particleJust do it again, do it again, do it again, do it again
Do it again, do it again
Do it again, do it again
