

# Viva La Revolution

## SuperEvolver

    Into the dungeon with evil men  
    The people have risen we're free again  
    Come out of the closet  
        Come out of the hole  
        Come out of the woodwork  
        Come into the fold  
        Rebels and fighters, a license to kill  
    Unite with the bandits down from the hills  
        Open your windows  
        Open your doors  
        Open your minds  
    To a freedom of thought  
    Viva la revolution, viva la revolution  
    Viva la revolution, viva la revolution  
        Raise our voices, raise our flag  
    Smash the symbols of the life we've had  
    Long live the people  
        Long live the scheme  
        Long live our hopes  
    Long live the dream  
    Dance in the streets at the carnival  
        Celebrate the victory now  
    Drink the wine from the rich man's cask  
    This revolution won't be the last  
    Viva la revolution, viva la revolution  
        Viva la revolution, viva la revolution
