

# Conventional Wisdom

## Built to Spill

Sometimes life surprises  
'Cause you never expected to be that  
Dangerous disguises  
That you never expect to see Some things never change  
Nothing's gonna change that  
Some things you can't explain  
Like why were all embracing conventional wisdom  
In a world that's just so unconventional Made you turn around  
But you never expected to see that  
That's what makes that sound  
That you never expect to hear Some things never change  
Something's gotta change that  
Some things you can't explain  
Like why were all embracing conventional wisdom  
In a world that's just so unconventional They don't know they're wrong  
But you know that they never can see that  
That's what makes them strong  
That they know that we'll never see
