

# Special

## Tamia

I'm, so in love with you  
Why, don't know what'd I do  
If your, not by my side  
I can kiss this whole world goodbye

I need you  
I wanna be engulfed by you  
You keep me high  
Feels I've drugged by you  
When I'm being loved by my baby  
Sweet baby  
It would take a fool to not know that what we have is  
Something special  
Special, oh, special, oh, oh, special  
It would take a fool to not know that what we have is  
Special

Oh boy, this fire can't be replaced by no one  
Even if oceans are staring in our face  
Take the wind from the air  
Light the world up if they dare  
Me and you, you and I, burning infinitely

All I need is you  
I wanna be engulfed by you  
You keep me high  
Feels I've drugged by you  
When I'm being loved by my baby  
Sweet baby  
It would take a fool to not know that what we have is  
Something special  
Something special, special, special  
Something special, special  
It would take a fool to not know that what we have is  
Something special

You bring sunlight to my face  
Excel my rainy days  
Always pray your love will shine my way, my way, my way, my way  
So let the storms come, I'll stand there in my come

No need to run, I'm with you, okay, okay, okay, okay

All I need is you  
I wanna be engulfed by you  
You keep me high  
Feels I've drugged by you  
When I'm being loved by my baby  
Sweet baby  
It would take a fool to not know that what we have is  
Something special  
Something special, special, special  
We've got something special baby, special  
All I need is you  
We've got something special
