

# Nothing Left

## Machine Head

Withered away I see it  
Every day complacent  
Desecrates the fabric of lies  
Emptiness fills inside me  
Bitterness has denied me  
Faith like this well  
Could I really give a shit When I feel it  
Come falling  
I turn you away I am the things that you fear  
My leap of faith without a sound  
Don't push my back against the wall  
Yes I have strength will never fall, will never Withered inside  
This soul has petrified  
As concrete fills the skies  
This life is disarray  
Consequence every action  
Brings violence from the passions  
Loneliness the emotion withering inside When I feel it  
Come falling  
I turn you away I am the things that you fear  
My leap of faith without a sound  
Don't push my back against the wall  
Yes I have strength will never fall I feel around the fall is on  
For so long I've been away..away  
For years to now been holdin' on  
For so long I've been away.. away I have nothing left for nobody else  
I have nothing left for nobody Feel it  
Come falling  
I turn you away I am the things that you fear  
My leap of faith without a sound  
Don't push my back against the wall  
Yes I have strength will never fall
