With Friends Like These

Slateface

Drowned in shame for believing in you
The evidence gave you away
You're not the first
You won't be the last
Can't trust what people say

With friends like these
I don't need any grief
I don't need any desparation
With friends like these
I don't need any hate
Don't need any aggravation

How many knives into how many backs
Demented mind no doubt
You locked yourself up on death row Now you're dying to get out

With friends like these
I don't need any grief
With friends like these
I don't need any hate
Don't need any aggravation
