

# The Lakes

## RHODES

We've come, no matter how far  
We've come, too frightened to carry on  
But imagine those deep blue skies waiting on  
No matter what time it takes  
We'll run away to the lakes  
And summer will find us there waiting  
We can see through the shadows  
With lights to be where we belong We can be safe in our own little place  
Where the skyline kiss the shore  
We will go on, we will go on and on  
We feel alive in the waters with divers  
The night fire warms our bones  
We will go all, we will go on and on  
My love, there's nothing else we can do  
And I still have faith in you  
The stars will come out and guide us  
Then we can see through the shadows  
With lights to be where we belong We can be safe in our own little place  
Where the skyline kiss the shore  
We will go on, we will go on and on  
We feel alive in the waters with divers  
The night fire warms our bones  
We will go all, we will go on and on Stay close, hold on to me  
By the lakes  
We can be safe in our own little place  
Where the skyline kiss the shore  
We will go all, we will go on and on  
We feel alive in the waters with divers  
The night fire warms our bones  
We will go on, we will go on and on  
We will go on and on
