

Special

Billon

(feat. Maxine Ashley)

I need somebody to make me come alive
I need somebody to take me high
I need somebody to make me touch the sky
So tell me, boy, can you be that guy
I need to be somebody's priority
I need somebody to satisfy me
I need somebody to realize my dreams
Oh oh oh, woah oh oh
Yeah, you need to know that

Baby, I need somebody to make me feel something special
Baby, I need somebody to make me feel something special
Make me feel something special

I need somebody to take me round the globe
Never on this planet I found my home
I need somebody to make me feel desire
Flossy, flaunty, needed, wanted
I need somebody to take me to a place
Of mad magic and fantasy
I need somebody to kiss my face
And never let the taste ever go to waste, yeah
Baby I, baby I, I think you need to know that

Baby, I need somebody to make me feel something special
Baby, I need somebody to make me feel
To make me feel something special
To make me feel something special

Baby, I need somebody to make me feel something special
Baby, I need somebody to make me feel something special

Baby, I need somebody to make me feel something special
Baby, I need somebody to make me feel something special

To make me feel something special
