Boom Boom

Devin Burris

When you hear that thump baby, does it make you wanna jump baby, up into the cab of this truck baby, we got a full tank of gas and girl the way you're shaking that ooh honey, you know you've really got me wanting something, so crank it up girl and keep it bumping, shimmy and shake, keep them speakers jumping.
Boom, Boom, higher than a full moon, Hey, Hey, hot enough to catch flame. Rock your body to the rhythm of the music now and let the groove just hit ya, come on girl, you're making my heart race when you put a little boom boom in that bass.
Forget about the band playing, naw I ain't even hearing what they're saying, when the music gets your hips to sway in, my heart starts pumpkin and it makes me wanna show you what these hands are for, naw we don't even need a dance floor, cause when you're shaking that thing like a tambourine, yeah you know what I mean girl scream a little bit of
Boom, Boom, higher than a full moon. Hey, hey, hot enough to catch flame. Rock your body to the rhythm of the music now and let the groove just hit ya, come on girl you're making my heart race when you put a little boom boom in that bass
You've got some firepower locked away in them jeans, and when you slowly slip em off, I can hear them cannons sing a little bit of
Boom, Boom, higher than a full moon. Hey, Hey, hot enough to catch flame. Rock your body to the rhythm of the music now and let the groove just hit ya, come on girl you're making my heart race, so shimmy and shake that ass all over the place, and put a little boom boom in that bass, yeah put a little boom boom in that bass, girl put a little boom boom in that bass.
