

# Call Me Mellow

## Tears for Fears

Fill the sky with love  
Fill the sky with love I wouldn't mind but she just turned up on the doorstep  
Wishful and ashen, slightly bedraggled  
Last time I saw her, she was howling at the moon  
Roaming the forest, lupine and rabid Oh, is she wild?  
Does she see my inner child? But then she knows it's like a curse  
To find the chosen roles reversed  
To unify my universe  
To call me mellow If only I was half my age and she was older  
We'd live on ice-cream on Coney island  
I know it's gravity that drags down my balloon  
She stays in orbit way after midnight Oh, slip and slide  
Does she go on to Elide? But then she knows it's like a curse  
To find the chosen roles reversed  
To unify my universe  
To call me mellow She'll dress down for us  
She'll break new grounds for us  
Watching me crackin' up She'll hang 'round fellows  
With all the ground swellers  
Driving me like a truck But then she knows it's like a curse  
To find the chosen roles reversed  
To unify my universe  
To call me mellow But then she knows it's like a curse  
To find the chosen roles reversed  
To unify my universe  
To call me mellow Fill the sky with love, fill the sky with love  
Fill the sky with love, fill the sky with love  
Fill the sky with love, fill the sky with love
